8<sup>th</sup> International Conference  
on  
Sustainable Solid Waste  
Management

23-25 JUNE 2021

# Welcome

---

On behalf of the Scientific and Organising Committee, I am pleased to welcome you to the **VIRTUAL THESSALONIKI 2021 8<sup>th</sup> International Conference on Sustainable Solid Waste Management**.

As in the cases of the previous international conferences, the **THESSALONIKI 8<sup>th</sup> International Conference** aims to make a step forward in the field of solid waste management through the promotion of innovative technologies and effective practices.

We are happy to announce that the series of our conferences keeps attracting the attention of the academia, private and public sector local authorities and businesses. This is proven by the gradual increase in the numbers of participants, the participating countries, the abstracts received and papers presented during the conference. This year we have almost 600 participants from 80 countries and 11 collaborating journals.

Every year significant effort is made to improve the quality of the papers and keep high standards, as proven by the increase of the papers finally published in the collaborating journals with high reputation and high impact factors. It is wonderful to announce that more than 200 papers have been published from the last HERAKLION2019 7<sup>th</sup> International Conference on Sustainable Solid Waste Management (e.g. 25 papers in RENEWABLE & SUSTAINABLE ENERGY REVIEWS, 45 papers in SCIENCE OF THE TOTAL ENVIRONMENT, 30 papers in WASTE & BIOMASS VALORIZATION, 47 papers in ENVIRONMENTAL SCIENCE & POLLUTION CONTROL, 42 papers in BIOMASS CONVERSION & BIOREFINERY, 16 papers in DESALINATION & WATER TREATMENT).

Quality is always our first and main criterion and that is why we are also establishing collaboration with new journals, e.g. this year we have for the first time:

**BIORESOURCE TECHNOLOGY (ELSEVIER, Impact Factor: 7.539)**. Prof. Ashok Pandey, the Editor-in-Chief is one of our keynote speakers this year.

At the same time, efforts are continuous in order to achieve high quality services for the conference participants. It is also important to mention the introduction for the third time of the summer school prior to the conference. We had more than 50 participants this year and our aim is also to continue it and keep it in all our future conferences giving emphasis to different research fields every year.

The **THESSALONIKI 2021 Conference** aims to stimulate the interest of scientific community, competent authorities of public and private sector and inform them about the latest developments and achievements in the field of solid waste management with special emphasis on municipal solid waste. Waste prevention, separation at source & recycling, biological Treatment (composting & anaerobic digestion), the treatment at central facilities constitute priority subjects of the conference agenda.

Attention is drawn to bioprocesses, biorefineries in waste management and of course Waste to Energy (WTE) with the contribution of the Waste-to-Energy Research and Technology Council, a co-organiser of this conference, and the active involvement of Prof. Nickolas Themelis, Chair of Global WtERT Council (GWC) and Prof. Marco Castaldi, Chair of WtERT-U.S.A. I would also like to

thank World Biogas Association and its President David Newman for his active support and the collaboration for the organization of this conference event.

Emphasis is placed on circular economy in all key action areas (production, consumption, waste management, secondary raw materials, innovation, investment & monitoring) and all priority sectors (food waste, plastics, biomass and bio-based-products, construction & demolition waste, critical raw materials).

The Conference will provide an opportunity to bring together scientists & professionals from government departments, industries, Municipalities, private institutions, research & education institutions, being a forum for the exchange of the most recent ideas, techniques & experiences in all areas of solid waste management.

A special Session will focus on solid waste management and the role of Local Authorities & Municipalities for taking advantage of both recyclable materials and biowaste.

The Conference agenda is rich and dense, offering a considerable variety of topics presented through more than 400 presentations within the twenty-seven different oral sessions and an extensive poster session with about 200 posters throughout the conference duration.

I would like to thank you all very much for joining us this year. Many of you are repeaters and we certainly appreciate that very much and we will continue our attempts to do our best at all levels in order to enlarge this warm conference family every year.

Also, I would like to thank the sponsors for the support to the conference.

We hope you will find the **THESSALONIKI 2021 Conference** useful and up to your expectations. Although it is a bit strange for us that the conference is taking place virtually, we are confident that we will meet in person in the next conference in a beautiful Greek Island in June 2022.

Maria Loizidou, Professor NTUA  
*Chair of the Scientific Committee*
